

Marlon C. Hario

Full-Stack Developer | Mobile: 09687405360 | Email: hariomarlon83@gmail.com

Professional Summary

Senior React and Full Stack Developer with 6+ years of experience building enterprise SaaS platforms, healthcare systems, fintech applications, learning management systems, real-time communication platforms, and business management solutions. Proven expertise in React, Next.js, TypeScript, Node.js, GraphQL, AWS, PostgreSQL, and modern frontend architecture. Experienced in leading frontend initiatives, implementing scalable component libraries, improving code quality, and delivering high-performance applications across distributed teams.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Tailwind CSS

Backend: Node.js, Express.js, Laravel, PHP, GraphQL, Apollo, REST APIs, PostgreSQL, MySQL, MongoDB, Redis

Tools & Cloud: Git, VS Code, Postman, Ollama + LLM (DeepSeek R1, Qwen 3, Llama 3), Cursor AI, ChatGPT AI, Claude AI, Github Copilot, Docker, AWS (S3, RDS), Jenkins, CI/CD, GitHub

Practices: Agile/Scrum , Unit Testing , Code Reviews, Microservices

Professional Experience

Senior React Developer | Oct 2024 – Aug 2025 | IT-SPAC | Contract

EncompaaS (Information Management Platform)

Technologies: Typescript, React JS, Next JS, MUI, OData and Storybook.

- Built scalable, reusable component systems to improve development consistency.
 - Delivered features from Figma with strong UI/UX accuracy .
 - Refactored legacy codebases for maintainability and performance.
 - Implemented end-to-end testing with Playwright.
 - Led frontend development in a microservices architecture.
 - Conducted code reviews to raise team code quality.
-

Senior React Developer | Mar 2024 – Oct 2024 | XAM | Full-time

thegrowthfaculty (Online Event and Learning Management System)

Technologies: Typescript, React JS, Next JS and Maestro.io.

- Built live event features using Maestro.io on the existing platform.
- Developed scalable backend APIs.
- Implemented monitoring and error tracking (Sentry, New Relic).
- Enforced code quality via reviews and best practices.
- Standardized tooling with Husky, ESLint, and Prettier.

DrTalk (HIPAA-compliant real-time platform)

Technologies: Typescript, React JS, Next JS and SignalR.

- Focused on front-end development.
- Built real-time features using SignalR (DrTalk).
- Created and shared coding best practices across teams.
- Developed reusable components for multiple projects.
- Resolved chat box bugs.

Front-end Developer | Oct 2021 – May 2023 | Adaca | Contract

PRISM (Market Investment App)

Technologies: Typescript, React JS, Recharts, Redux, Axios, React Query and SASS.

- Built data visualization charts and market graphs.
- Implemented features from Adobe XD mockups.
- Managed state with Redux.
- Fixed bugs and improved error handling.
- Applied best practices in Sass, React hooks, and state management.

gsquared. (Task Management System)

Technologies: Typescript, React JS, React Query, Axios, Material UI, React native, redux toolkit , Redux and SASS.

- Built UI from scratch using TypeScript, React, MUI, Axios, and React Query.
- Created reusable components, hooks, and utilities following SOLID principles.
- Implemented state management and data caching.
- Developed features from Adobe XD mockups.

Full-stack Developer | Jul 2020 - Oct 2021 | Prospertogether | Contract

Trading Platform

Technologies: Typescript, React JS, D3-shape, NoSQL, GraphQL, express, node js, Redux, React Query, redux toolkit, JWT, Nodemailer, Cypress, PostgreSQL, Blockly, SocketLabs, Plaid and Alpaca.

- Configured PostgreSQL and built optimized queries.
- Set up Apollo Client/Server for frontend–backend communication.
- Implemented JWT auth, middleware, and user access control.
- Applied MVC architecture and best practices.
- Integrated Plaid and Alpaca APIs for banking and crypto trading.
- Built charts, crypto data views, and user management features.
- Managed frontend state with Redux and implemented mailing functionality.

Front-end Developer | Jan 2020 - Jul 2020 | Sellgo | Contract

Amazon Seller Database

Technologies: Typescript, React JS, Axios, highcharts, lodash, react-helmet, Semantic UI and Redux.

- Built UI with React, TypeScript, Redux, and modern libraries.
- Developed multi-step forms, auth (login/register), and responsive layouts.
- Implemented CSV uploads, data tables with filters/search, and API integrations.
- Created user guides, video modules, and onboarding features.
- Assisted in refactoring, bug fixing, and state management.

Full-stack Developer | May 2019 - Dec 2019 | Segworks | Contract

Hospital management and healthcare services System

Technologies: Typescript, MySQL, NoSQL, Node JS, React JS, jQuery, Bootstrap, Yii PHP, Laravel, Vue JS .

- Developed full-stack features using React, Node.js, PHP, and SQL/NoSQL databases.
 - Built report generation for billing and clinical data, including print formats (JasperReports).
 - Created clinical and billing form UIs with complete functionality.
 - Implemented backend APIs and database queries to support system features.
-

Front-end Developer | Jan 2019 - Apr 2019 | Freelance | Freelance

Blogs, Magazines and Hybrid landing page

Technologies: Wordpress, Divi theme, HTML5, SASS.

- Designed landing page mockups using Adobe Photoshop.
 - Created banners, logos, and graphic assets with Adobe Illustrator and Photoshop.
 - Built responsive WordPress websites using the Divi theme.
 - Installed and configured WordPress plugins and themes.
 - Customized websites based on client requirements.
-

Full-stack Developer | Jun 2017 - May 2018 | WISE | Contract

Real Estate Application & Eatery POS with Inventory Management

Technologies: MySQL, NoSQL, React JS, Node JS, Express, jQuery, Bootstrap, PHP, Laravel, Vue JS, Redux.

- Designed UI/UX in Photoshop and converted mockups to responsive HTML/CSS.
- Built frontend functionality with JavaScript, React, and jQuery.
- Integrated APIs using Axios with local caching and global error handling.
- Developed charts and data visualizations.
- Connected frontend to backend services.
- Implemented real estate calculation logic.

Education

2013 - 2015 | Bachelor of Science in Information Technology (BSIT)

University of Mindanao

Matina, Davao City, Davao Del Sur

2009 - 2011 | Computer Programming

Computersense College of Communication & Technology

R. Castillo Street, Agdao, Davao City, Davao Del Sur

2007 - 2008 | PC Operation and Consumer Electronics

Ansuico Foundation Advance Technical School Inc.

Km. 13 Panacan, Davao City, Davao Del Sur
